

Technical Report
February 2025

I have migrated the website to the Backdrop content management system (backdropcms.org).I now consider it to be secure, now and for the foreseeable future. As of today, It has a "plain jane" appearance which is barely acceptable. I intend to proceed as follows:

- 1 Improve the appearance incrementally.
- 2 Produce a report listing improvements which should be made to the site.
- 3 Improve the site per the report, as prioritized by the Board.

Moving forward, I will be experimenting with the Drupal 11 CMS, and will consider a migration at some future date. I am open to suggestions for other systems. CMSMatrix.org, which is now defunct, listed over 1300 of these systems. I do not have enough time to test them all.

I will now be able to devote more time to planning for the new equipment install.

I have been meaning to come into the station to work on some things, and I may do this Thursday-Friday. If so, I'll see you at the meeting.
